The WETTASK® Refillable Wiping System

The WETTASK® Refillable Wiping System is the ideal alternative to using a spray bottle or open bucket in combination with a rag. This system combines all steps into one, making it easy to use and incredibly versatile. Choose the wiper that works best for your task and add the chemical solution you already use. It's an ideal choice for cleaning and disinfecting surfaces.

- Enclosed system helps reduce cross-contamination and exposure to chemical vapors or splashes

Choose one of two bucket sizes according to the size of your task. Use this chart to determine which product best suits your needs.
