KLEENGUARD* A40 Liquid & Particle Protection Lab Coats (right, in photo above) from Kimberly-Clark Professional are made from a microporous film laminate fabric that offers superior particle holdout while allowing excellent breathability. They provide a variety of advantages of liquid and particle protection lab coats made of Tyvek®: better liquid barrier, better particulate barrier, and lower linting. The KLEENGUARD* A40 Liquid & Particle Protection Lab Coats meet the ANSI/SEA 101-1996 sizing standard and pass NFPA 99 criteria for anti-stat materials. The lab coats feature a snap front chest and hip pocket. For more information, visit www.kcprofessional.com.
