KIMTECH PURE\* CL5 Critical Task Wipers from Kimberly-Clark Professional are ideal for use in ISO Class 5 or higher cleanrooms. The wipers are made from a continuous filament rayon/polyester spunlace blend, which gives them a cloth-like feel. They contain no binders or surfactants, and thus have low extractables. These wipers have a high water absorbency rate and excellent absorption efficiency and capacity. They can be Autoclaved and ETO-sterilized. They are delivered double-bagged in anti-stat packaging. Two sizes are available: 9"x9" and 12"x12". Also available from Kimberly-Clark Professional are KIMTECH PURE\* CL5 Critical Task Sterile Wipers (right), for ISO Class 5 or higher cleanroom environments where sterility is required. These wipers have the same performance features but are also compliant with AAMI Guidelines. They are Gamma irradiated to a  $10^{-6}$  Sterility Assurance Level. For more information, visit [www.kcprofessional.com](http://www.kcprofessional.com).
