

Cleaner, Fresher, All the Time

Introducing Dispensers with MICROBAN® Protection

KIMBERLY-CLARK PROFESSIONAL* is taking clean to a whole new level with a wide range of dispensers that feature MICROBAN® protection.

Available exclusively with KIMBERLY-CLARK PROFESSIONAL* Dispensers, MICROBAN® technology provides built-in anti-microbial protection against most common stain and odor-causing bacteria. MICROBAN® protection helps prevent odor and stain microbes from growing and reproducing.

- Continuous protection against common bacteria such as yeasts, molds and fungi that cause stains and odors.
- Added during manufacturing so it becomes an integral part of the dispenser.
- Keeps dispensers fresher and cleaner between cleanings.

- Will not wash off or wear away so it provides protection for the useful life of the dispenser.
- EPA registered with a long history of safe use.

A great new way to inhibit the growth of microbes.

Left untreated, this plastic lid does nothing to prevent the growth of bacteria (seen in yellow surrounding and growing on the lid).[†]

Treated with MICROBAN[®] antimicrobial, this lid and a wide area surrounding it (seen in grey) observes a significant reduction in bacterial growth.[†]

How MICROBAN[®] Protection Works

It works by inhibiting the growth of microbes. When bacteria and other microbes come in contact with a dispenser protected with MICROBAN[®] antimicrobial, the bacteria can no longer function. MICROBAN[®] protection penetrates the cell wall, and effectively prevents the microbe from growing and reproducing.

Effective against most bacteria, yeast, molds and fungi, MICROBAN[®] is built in during manufacturing and continues to work for the life of the dispenser.
