JRT® COMBINATION TISSUE DISPENSER

Dispenser is made of a durable white plastic body and cover. Front cover includes provision for custom deco strip. It can dispense either two full 9.38" diameter rolls or one standard 13" diameter roll plus stub roll. All rolls have a 3.8" width and a 3.25" diameter core. With two full 9.38" rolls it holds more than the equivalent in length of ten standard rolls. Design minimizes run-out, waste, and maintenance time. Features hinged front cover, push button for easy opening or common key lock to reduce pilferage, and tear-off bars on sides and front of dispenser opening. Dispenser is shipped 1 per case.

Suggested Mounting Height: 30"

NOTE: Unless otherwise noted, suggested mounting height is the distance from the floor to the bottom of the dispenser.
