

CONTAMINATION?

NOT ON MY WATCH.*

At Kimberly-Clark Professional, we're as serious as you are about disinfection.

Our KIMTECH PREP* Wipers for Bleach, Disinfectants and Sanitizers are specifically designed to be compatible with quaternary amine and bleach disinfectant solutions. Cotton rags aren't. That's why KIMTECH* Prep Wipers are an ideal choice when it comes to optimizing your cleaning and disinfection practices.

In addition, the enclosed WETTAS* System helps avoid contamination of wipers and cleaning solution by eliminating redipping which can happen when using an open bucket system. Our more effective wiping material combined with our closed bucket system offers you the right tools for optimum disinfection.

For a free product sample go to:
www.kimtech.com/wettasksample

The WETTAS* System consists of a dry roll of the KIMTECH PREP* Wiper of your choice placed in our closed bucket or small canister. You add the disinfectant you normally use.
