

Apparel Demonstrations

KLEENGUARD* A30 Breathable Splash & Particle Protection Apparel

Overlay Demonstration

1. Lay the KLEENGUARD* A30 coverall on a flat surface.
2. Place the same size Tyvek® coverall on top of the KLEENGUARD* A30 coverall.
3. The KLEENGUARD* A30 coverall has 6% longer body length. More room in the shoulders and crotch and 12% more chest room.

Ripout Demonstration

1. Put Tyvek® coverall on, squat down and pull arms forward to show how garment does ripout.
2. Put KLEENGUARD* A30 coverall on, squat down and pull arms forward to show how garment has extra room due to REFLEX* design.

* Note: Both photos were taken with the same worker, one with Tyvek® (size XL) and the other with KLEENGUARD* A30 Coveralls (size XL)

Breathability Demonstration

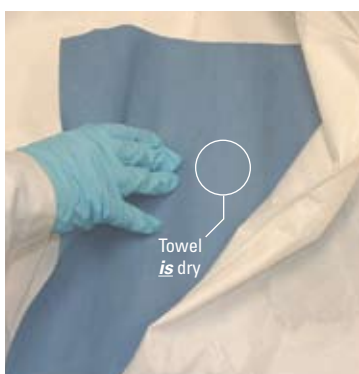

1. Put Tyvek® coverall up to your mouth and try to blow through the material. Breathe in and out to demonstrate that you can not blow through the garment.
2. Put KLEENGUARD* A30 coverall up to your mouth and blow through the material. Breathe in and out to demonstrate that you can indeed see breathability.

WD-40® Lubricating Oil Demonstration

1. Take Tyvek® garment from previous demo.
2. Lay the Tyvek® coverall on a flat surface.
3. Unzip garment and place any WYPALL* wiper under the label inside garment and zip up garment.

4. Spray WD-40® Lubricating Oil directly on the garment below label for 5 seconds.
5. Wait 10 seconds and unzip garment revealing the WYPALL* wiper on the inside of garment - note, bleed through.

6. Lay the KLEENGUARD* A40 coverall on a flat surface.
7. Unzip garment and place any WYPALL* wiper under the label inside garment and zip up garment.

8. Spray WD-40® Lubricating Oil directly on the garment below label for 5 seconds.
9. Wait 10 seconds and unzip garment revealing the WYPALL* wiper on the inside of garment - note, no bleed through.
