

KIMBERLY-CLARK* **SAFESKIN***

PURPLE NITRILE*,
PURPLE NITRILE-XTRA*,
PURPLE NITRILE*
Sterile Singles & Pairs Exam Gloves

In any healthcare setting, protection from exposure to microorganisms is of critical importance—for you and for the patients under your care. Gloves provide the primary shield required to prevent contact with infectious substances, including bloodborne pathogens, and reduce the risk of cross-contamination.

From proprietary latex and nitrile formulations made under the strictest quality control for use in high risk procedures, to economical vinyl for low risk situations, there's a KIMBERLY-CLARK* **SAFESKIN*** glove that's right for every clinical task. Our complete line includes gloves for primary care services, diagnostic tests, surgical procedures, dental procedures, and general use applications.

Functional Benefits:

- Unique purple color provides quick, visual differentiation from natural rubber latex and other synthetic gloves.
- Textured fingertips enhance wet and dry grip.
- Custom design enhances comfort and fit.
- Available in 9½" and 12" lengths.
- Available in sterile singles and pairs.

Clinical Specifications:

- Natural Rubber Latex-free – primary material is acrylonitrile-butadiene, reducing the potential for glove-associated Type I allergic reactions to natural rubber latex proteins.
- Powder-free, minimizing the potential for powder-related complications, such as irritant contact dermatitis.
- PURPLE NITRILE-XTRA* material has been tested for use with ten chemotherapy drugs and glutaraldehyde to determine permeation and breakthrough times. Test results on file.

Kimberly-Clark® SAFESKIN® Medical Gloves

Product Specifications:

PURPLE NITRILE Measurements (Target)	gauge thickness (measuring single thickness)		average length
	MM	MIL	
Middle Finger (15mm from tip)	0.15	5.9	242 mm or 9.5" 305 mm or 12" <i>(measured from the tip of the middle finger to the edge of the cuff)</i>
