

WypAII® WetTask™

Customizable Wet Wiping System

Satisfy tenants and staff with customizable cleaning wipes

You can help ease tenant back-to-office and staff cleaning concerns with customizable wet wipes in closed container system. This helps ensure hygiene, makes it easy to get the job done correctly and efficiently, and enables you to affordably tailor your own surface wipes.

Step up to the enhanced hygiene of surface wipes at up to half the cost¹ with the #1 DIY Wet Wipes System in North America.²

Works when others fail

no spray mist

Maintains active strength over 24 hours when microfiber, cloth and cellulose wipes do not3

Avoids under-spray/over-saturation Apply an even coating of the right

dose and go; avoid premature dry wiping due to drenched surfaces

Helps capture savings

Chemical reduction from closed bucket wipes; wipes savings with refills; no laundering

Did you know?

WetTask™ base sheets in closed bucket have been shown to maintain bleach and quat active concentrations for 24 hours, if not days, unlike microfiber, cloth rags or cellulose-based wipes in open bucket.³ WetTask™ is also the only DIY surface wipes system in North America with **three** substrate options to ensure you have the optimal base sheet for your chemical and cleaning

87% of employees were **somewhat or** very concerned about returning to an office building.6

The average office desk has 400X more bacteria than a toilet seat.7

90% of people perceive large office buildings as posing a moderate or high germ risk.6

> Chemicals and fumes are among the top hazards for cleaning personnel.8

The commercial cleaning industry typically rehires for the same position 2X-4X each year.9

- 1 Based on 07/2022 online audit of publicly available end user pricing of WetTask™ Meltblown SKUs, leading B2B chemical concentrates, от муже от от в выше в при учение в при уч
- Based on 2021 U.S. and Canada market data of WypAll® WetTask™ versus other closed bucket systems with wipes rolls designed for full saturation in chemical solution.
- Based on time-bound study of substrate-expressed antimicrobial solutions using test strips to determine Quat and Bleach PPM (parts per million) concentrations with WetTask*M06411 versus microfiber, cloth rags or cellulose-based wipes in open bucket.

 Based on July 2022 KCP audit of widely distributed customizable Wet Wipes Systems in North America using publicly available information of manufacturer websites to determine the number of substrate options offered. Substrate option is hereby defined as one that is different from another in technology (e.g., Meltblown) and/or material (e.g., Polypropylene).
