WypAll® WetTask™

Customizable Wet Wiping System

—

Step up to the enhanced hygiene of surface wipes at up to half the cost[1]

with the #1 DIY Wet Wipes System in North America*

Works when others fail
Maintains active strength over 24 hours when microfiber, cloth and cellulose wipes do not[2]

Reduces chemical exposure
No open bucket spills or fumes; no spray mist

Avoids under-spray/over-saturation
Apply an even coating of the right dose and go; avoid premature dry wiping due to drenched surfaces

Helps capture savings
Chemical reduction from closed bucket wipes; wipes savings with refills; no laundering

WypALL® BRAND
CONFIDENCE IN EVERY CLEAN

Why change to WetTask™?

WetTask™ base sheets in closed bucket have been shown to **maintain** bleach and quat **active** concentrations **for 24 hours**, if not days, **unlike microfiber, cloth rags or cellulose-based wipes** in open bucket:

Quat formula[2]
Percent quaternary amine disinfectant actives released from substrate over time

- ■ WetTask™ 06411, quaternary amine disinfectant, closed bucket
- ◆ Cotton Rags, quaternary amine disinfectant, open bucket
- ● Microfiber Wiper, quaternary amine disinfectant, open bucket
  Results comprised of testing performed on four different microfiber wipers from leading manufacturers.

Bleach formula[2]
Percent chloride ion actives released from substrate over time

- ■ WetTask™ 06411, bleach, closed bucket
- ◆ Cotton Rags, bleach, open bucket
- ▲ Cellulose-Based Wiper, bleach, open bucket
  Microfiber wipers not recommended for use with bleach due to the resulting fiber destruction when placed on the wiper.

WetTask™ is **the only** DIY surface wipes **system** in North America **with three substrate options** to ensure you have the optimal base sheet for your chemical and cleaning needs.[3]

WetTask™ System Base Sheet Performance	All-Purpose Cleaners	Active				Solvent			Material
