contact safe

GENERALCLEAN™

Maintain a clean environment for employees and customers

Our **WypAll® GENERALCLEAN™** range provides **smart, easy solutions** that are ready to use when and where needed for **everyday cleaning and maintenance tasks** such as wiping spills or absorbing liquids.

WYPALL®
BRAND

L10, L20 **GENERALCLEAN™**

Create a clean work environment with effective light-to-medium-duty general cleaning solutions. Leave no debris behind – to make work easier, faster and more efficient.

WypAll® L family offers a wide range of wiping solutions. Clean, absorbent and durable paper wipes are designed with the customer needs in mind, along with versatile dispensing solutions.

X60 GENERALCLEAN™

Quick and reliable cleaning results that go beyond industrial tasks

Enable fast, general-purpose cleaning. Highly absorbent, these cloths are precision-engineered to reduce waste and drive sustainability practices with up to 5 times the reuse.

WypAll® X60 Multi-task cleaning cloths help reduce waste driving sustainable practices. Designed with HyperAbsorb™ technology that:

- Is highly rated by users for its speed of absorption
- Provides great durability

Durable and Lasting

Quick Absorbing

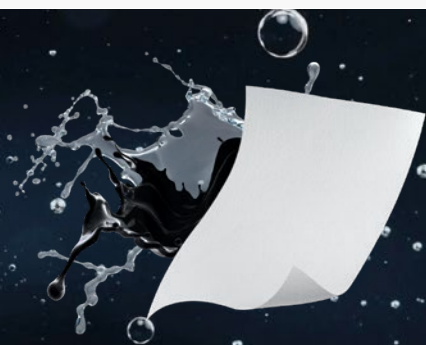

Reusable Product

X60
GENERALCLEAN™

***Versatile
Performance***

Help reduce waste with a cleaning cloth that combines great durability, exceptional absorption speed, and can be reused up to 5 times.

RIGHT PURPOSE WIPE

Go beyond all-purpose with cleaning solutions designed for your tasks.

A Kimberly-Clark Professional™ programme that helps you to find the appropriate non-woven cloths for your specific application.

Scan to select the right
wipes for your task

Why do you need to go beyond all-purpose?

There is a science behind wiping and it all depends on the type of mess you are tackling. Our product development team at WypAll® meticulously analyses each substance and surface, and the ideal way of cleaning it.

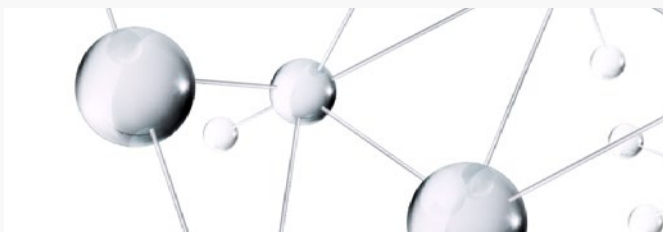

Absorbing Liquid

Liquid absorption is done best by a wipe engineered with highly absorbent natural fibres.

Removing Oil, Grease and Grime

Oil, grease and grime removal depends on the texture of a synthetic fibre that conforms to the surface while remaining durable and absorbent.

Working With Solvents and Harsh Chemicals

Chemicals and solvents can erode the integrity of certain fibres. Synthetic fibres are more resistant to harsh materials without compromising performance.

Cleaning Challenging Surfaces

Rough and abrasive surfaces require a wipe that's higher in density and equipped with a weave and texture engineered for durability.

WypAll® Chemical Compatibility

Base Sheet Technologies

Products	Base Sheet Technology	Surface Cleaning with:		Absorption/Release of Solvents:
		Detergents & Water	All-Purpose Cleaners	Solvents
WypAll® X70, X80	Hydroknit®	✓	✓	✓

Technologies overview

Airflex™

Airflex™ is our unique highly absorbent paper technology. The paper has open areas within the wiper to absorb fluids and a texture to pick up small particles. We have optimized the technology over the past 25 years to provide superior performance.

DRC (Double Re Creped)

This base sheet technology produces a plush, soft surface with pockets in the inner layer to enhance absorbency and adding strength over a paper towel. Very soft on hands

Hydroknit®

The most versatile choice for everyday industrial cleaning tasks. Hydroknit® is a mix of cellulose and nonwoven fibres that have been hydro entangled delivering a highly absorbent and strong wiper.

LDC (Light Dry Creped)

The technology creates multi-pplies that gives fluid absorbency and surface cleaning. Cost-effective solution for general cleaning & wiping.

Meltblown

Great technology for low lint applications and for cleaning where fluid/chemical uptake and delivery is necessary. Compatible with a larger range of cleaners, solvents and sanitizing/disinfecting agents. Best chemical compatibility with leading chemicals (quats, bleach, hydrogen peroxide & peracetic acids) for sanitising and disinfecting applications.

Spunlace

A blend of fibres that are entangled into a structure that results in surface texture, bulk, durability and/or fluid absorbency with metered fluid release. This technology is suitable for a broad range of performance attributes. Including: dispersibility to durability, varying levels of absorbency, durability, fluid delivery and chemical compatibility based on fibre selection and basis weight.

Which format is the best one for you?

Centrefeed

Versatile mid-size rolls for use inside or outside a dispenser.

Jumbo Roll/Large Roll

Large rolls with big sheets and high capacities, for process environments.

Quarterfold

Pre-folded square sheets, taken one at a time from a hygienic wrap or dispenser.

Interfolded

Sheets folded together so that dispensing one sheet pulls the next through.

POP-UP™ Box

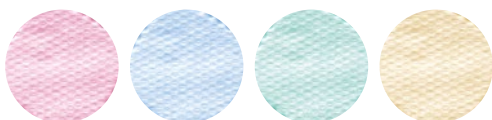

Small and portable dispensing box of individual sheets.

BRAG™ Box

Mid-size double sided bench-top dispensing box of individual sheets.

Which colour?

Colour-coded (Red/Blue/Green/Yellow)

Choose a colour-coded cloth to identify different wiping tasks in segregated cleaning.

Blue

Choose blue for food hygiene compliance, or for oil or water saturation to be visible.

White

Choose white to see that dirt has transferred from surface of sheet, or when dye-free is needed for use with chemicals.
